APPENDIX 4

TABLE OF CONTENTS

TITLE   **PAGE NO.**

BACKGROUND AND OBJECTIVES

➢ BACKGROUND:

This website would be really helpful for our users and customers. This tour and travel website can be used by anybody, whether young, adult or old. This website will act as your companion to help you plan and organize your trip and holiday. This website can provide users many options and tour packages in an affordable price. In case of any difficulties arise in using the website the users and text their queries in the query section or can gmail us. This website will definitely give the audience a wider range of options and a whole new experience.
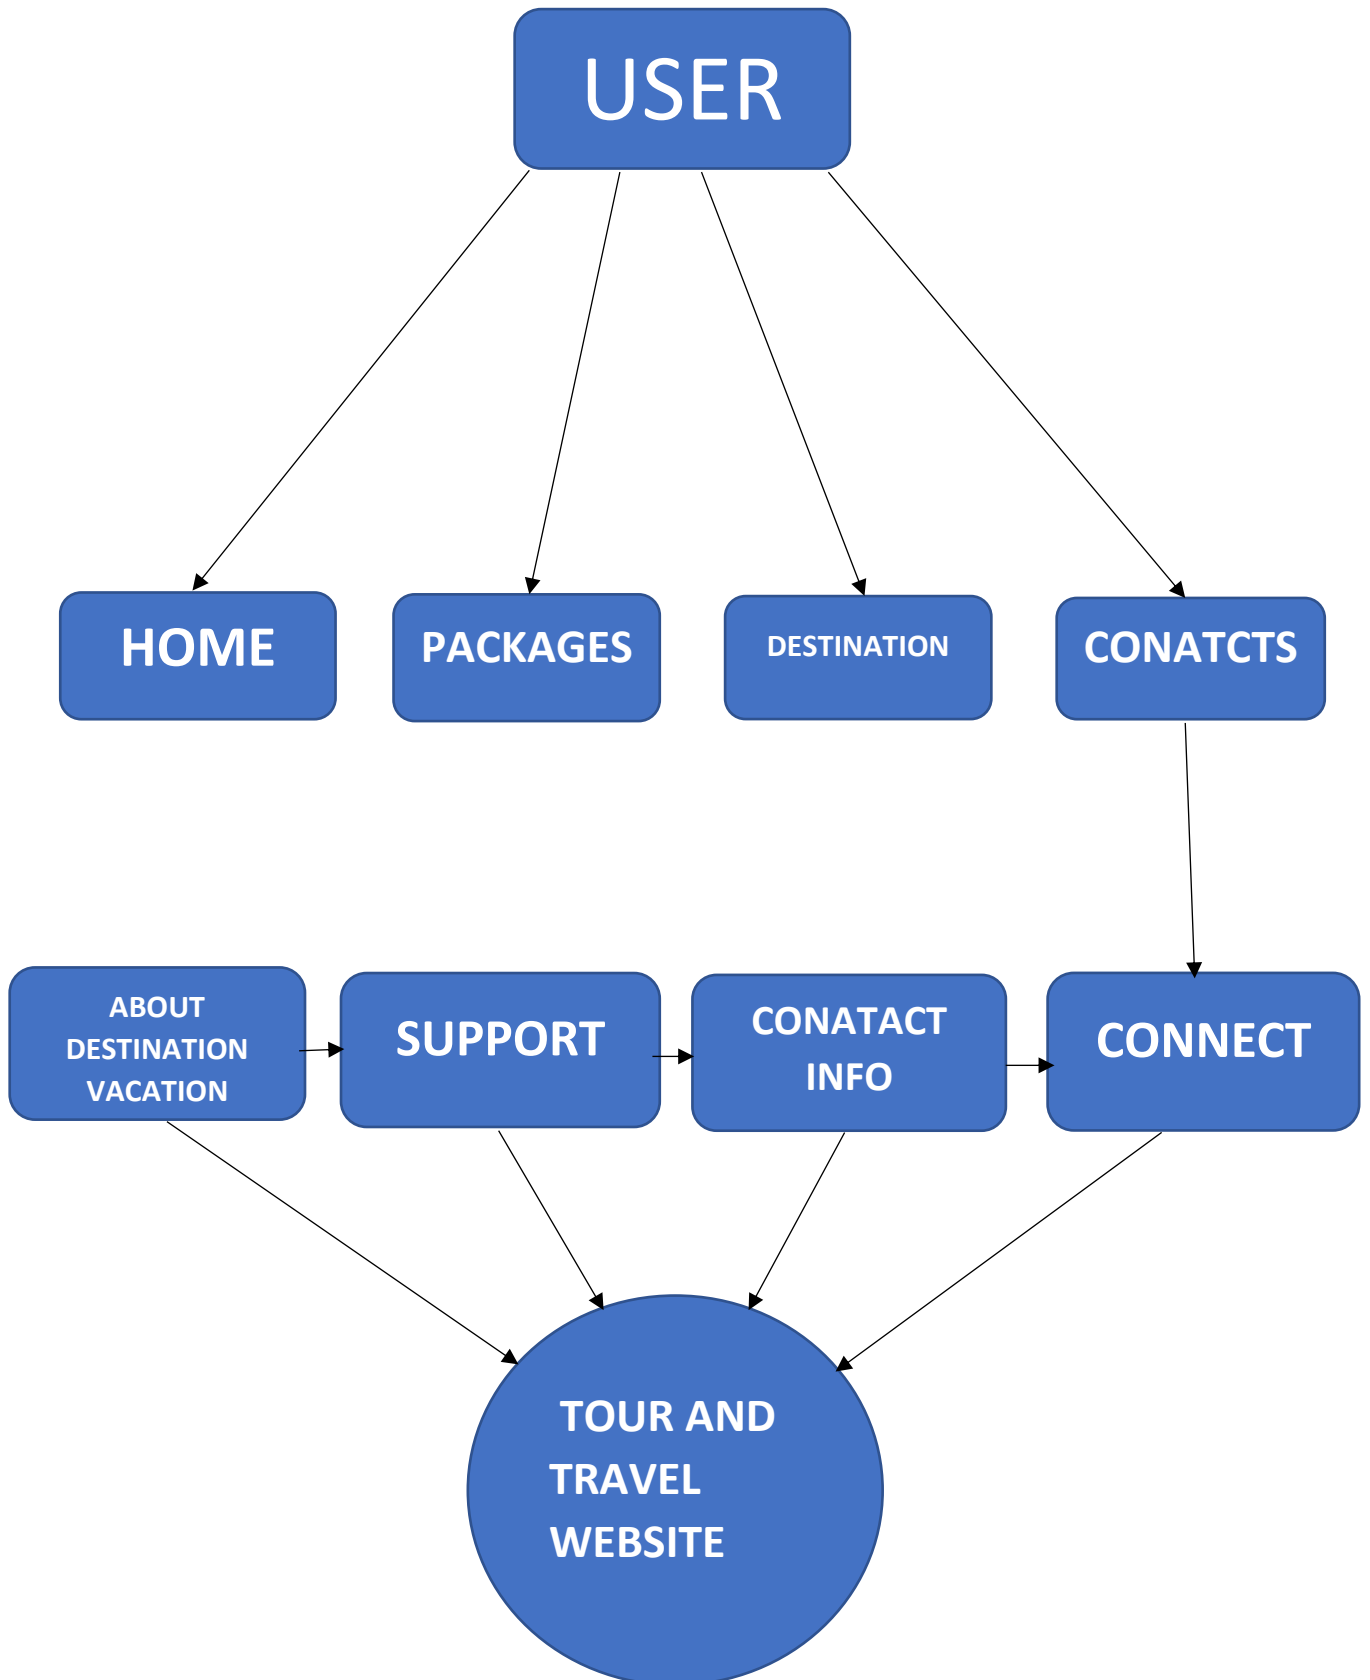

➢ AIM AND OBJECTIVES:

The main purpose of designing this website is to provide our users a whole new experience and to replace the current manual system of ticket booking of trains and flights in which people have to face a lot of difficulties.

➢ MOTIVATION AND OUTCOMES:

Travel website, as described above can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help or users In better utilization of resources. This website can maintain computerizes records without redundant entries. That means that one need not to be distracted by information that is not relevant, while being able to reach the

information. It may also help in collecting perfect management in details. In a very short time, the collection will be obvious, simple and sensible. It will help a person to know the management of passed year perfectly and vividly. It also helps in current all works relative to Travel website. It will also reduce the cost of collecting the management & collection preocedure will go on smoothly. In the present time many i.e, after the post pandemic era the people are searching for new places to travel, some are also planning to go on a decent holiday with their friends and family. So this website will definitely be a new game changer in the market and have a real positive effect on users.

IMPLEMENTATION OF PROJECT
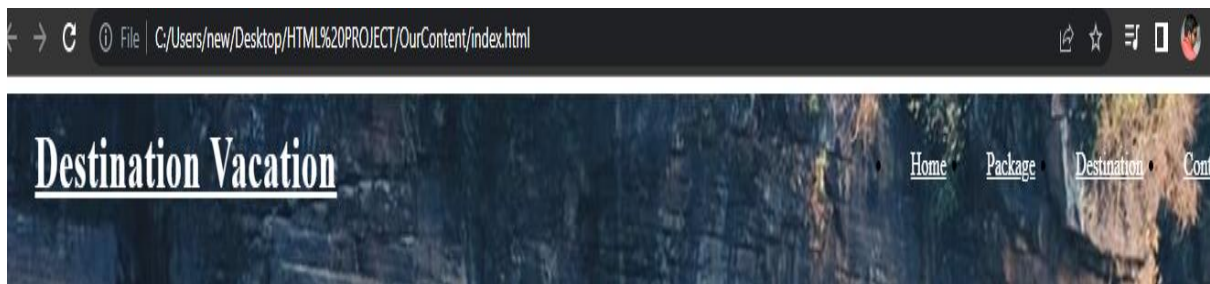

❖ WELCOME TO THE WEBSITE

❖ KNOWING THE WEBSITE:

This is the first page and look of the website when opened. This section explains the functionality of various tabs, buttons, and options present on the website. This first page also gave the user a whole new experience in the world of tour and travels. The format of the website is very simple that will definitely make the website very interesting. Each and every tab is explained here in full detail in order to make the functioning more efficient and user-friendly.

➢THE MAIN BAR:

The main bar is present at the top side of the first webpage. This section is responsible for creating and providing more creative and user-friendly access to the website. The can user browse almost all the options listed in the features of the website.

This is the main bar of the website. It has 4 different, unique and interesting icons including the options such as Home, Package, Destination, and Contacts. This will make the website more unique and user catchy. This also helps the users to engage with our website and will definitely give them a whole new experience.

➢HOME ICON:

By using the Home icon, user can return back to the Home page from the other tabs of the website. In the Home page there the user will again see the original page of the website and then proceed to other tabs from there like to the Package section, Destination section, and Contacts and others as per the user choice. User ca also proceed to special offer section from the home page only.

➢PACKAGE AND DESTINATION SECTION:

**Our Upcoming
Spiritual Tour Package**

Our packages (special) and destination section provides to users to choose from a variety of options and helps them to patiently surf without getting bored. Customers will get their respective tour packages in an affordable price. Users can directly reach the package and destination section from the main bar. In addition with all these we have come a series of special spiritual tour packages for our dear users which they can enjoy with their friends and family. This offer is for a limited time only. The photos attached in this section will gave the users a brief idea about the the travel destination.

➢ ABOUT, SUPPORT & CONTACTS:

This section consists of support and contact information plus it also have the needed sites to visit and follow us at Instagram, Facebook, Linkedin etc. and users can ask us questions and queries according to their need. For an issue related to the working and functioning of the website or for any complaints, suggestions or some help related issue the users are free to call us at the provided number and the gmail.

This section also contains privacy policy which must be read before using it for own benefit. Soon we are gong to add a site map at the website so it help the users to make their plan and choices quickly.

➢ TECHNOLOGY USED:

Three designing languages are used in building this website namely HTML and CSS. This webpage can be opened with any browser such as Chrome, Firefox, Internet Explorer etc.

➢ MERITS OF THE PROJECT:

- This project gave us a clear overview about HTML and CSS and made us understand it in a practical and descriptive manner.

- This project gave us a good lesson in understanding the working and functionality of any professional website and it made us aware of the demands, needs, of the public of the current generation.

- This project helped us with a lot of information about cascading style sheet and HTML. It also help us to have a slight idea about javascript.

SWOT ANALYSIS

STRENGTH:

The "Travel Website" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by the existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

WEAKNESS:

Problems may arise in privacy and bugging issues. Even today many people fear using online sites for their important works and uses. Also many people are not aware of computers and its uses so it is a big challenge to implement this system on a large scale.

OPPORTUNITIES:

It creates scope for IT freelancers and Tech-skilled people for the designing, functioning, management and the future advancement of the website. This will also create scope for the people with communication skills to deal with the various issues and problems faced by our users. It also creates a scope for more and frequent development in the field of web development.

THREATS:

Increasing competition in the web development market, race to make highly secure websites, bugging and privacy, data leakage, scope of travel websites in the near future after the post pandemic era may are a genuine threat to this website.
